- System Evaluation & Web Technologies

PROJECT

Revolutionizing Healthcare Management with Agile: A Scalable and User-Centered Solution

- Developed a Healthcare Management System using Agile methodologies, integrating patient record management, appointment scheduling, and billing.
- Applied OOP concepts (inheritance, polymorphism, abstraction) to structure system components efficiently.
- Implemented iterative feedback loops with healthcare professionals, ensuring system adaptability and usability improvements.
- Delivered a functional MVP (Minimal Viable Product), showcasing strong problem-solving and software design skills.
